

- Flexible and guaranteed comfort in all conditions
- Easy to use
- Increased system reliability
- Prompt corrective and emergency actions
- Energy optimisation
- Increased system service life
- Start-up via WEB

## Clivet P-MATIC for Multiplex

Supervision System specialised in the management of climate control systems for multiplex cinemas with Clivet heat pumps

# Clivet P-MATIC for Multiplex

Supervision System specialised in the management of climate control systems for multiplex cinemas with Clivet heat pumps

**Clivet P-MATIC for Multiplex** controls the Clivet climate control units, air diffusion in the theatre and any built-in control points (air extractors, luminous signs, suction hoods, etc.).

Use of **Clivet P-MATIC for Multiplex** enables a proper maintenance activities. In fact, it is able to guarantee a number of significant advantages, including:

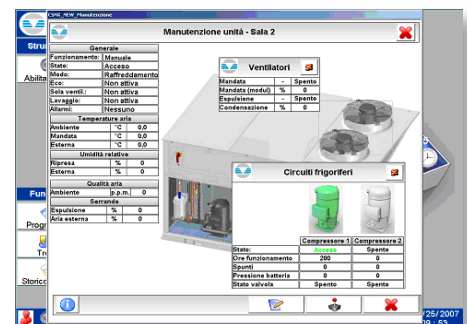

- An adequate and constant level of service in terms of employee and customer comfort, hygiene and safety
- The complete peace of mind of the personnel responsible for running the centre, meaning that they can focus on more important jobs
- Reduced costs for corrective or emergency actions
- Prompt and effective intervention in the case of faults or inefficiency
- No more wasted energy, meaning a consequent reduction in environmental impact
- Extended system service life

**Clivet P-MATIC for Multiplex** can be used to manage:

- Switching the machine on and off automatically or manually
- The unit operating status
- The unit alarms
- The temperature setpoints
- The relative humidity setpoints
- Operating trend display and print-outs
- Air diffuser control and regulation in the theatres

Each piece of equipment can be manually or automatically controlled using the scheduler.

**Clivet P-MATIC for Multiplex** makes it possible to achieve a totally "transparent" picture of the system operation, to control the units on an individual basis, either manually or automatically, and to observe the presence of alarms in real time, as well as to carry out rapid fault finding.

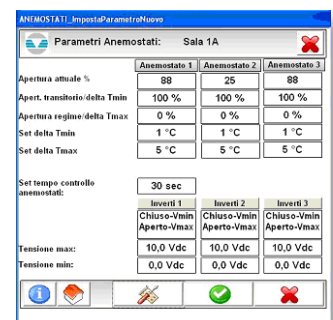

The software has user-friendly 3D graphics and enables the immediate identification of the rooms and units in question.

The anemostats can be regulated by the system using different operating logic: in fixed positions or with automatic fin adjustment.

**Clivet P-MATIC for Multiplex** is entirely developed and manufactured by Clivet and undergoes individual testing before delivery. The supply typically comprises:

- Supervision workstation, complete with professional Personal Computer with high frequency Intel processor, high resolution TFT monitor, DeskJet A4 printer, convertor box for RS485 serial communication and ADSL or modem remote control system.
- Control panel, with built-in microprocessors and power auxiliaries
- Control and supervision software
- System control elements, such as ambient temperature probes.
- Navigation menu customisation comprising graphic representations of the building in 3D and by individual floor.

Each system also comes with the Clivet check-up, training and start-up.
